

TWO GIANT COOLING TOWERS FOR INCO MINE

2004

Chemposite has completed a contract to supply two 6 m in diameter and 10 m tall FRP OAH Cooling Towers, plus one 6 m diameter in 6 m high Seed Tank for New Caledonia, USA.

This project manufactured in our China plant in Zhongshan contain special features such as: dynamic wall curtain, external wall plenum, discharge chute, internal baffle, and rotating demister assembly complete with bearings and top stiffeners. With the diameter measuring 6 m, approximately 20 ft, the two towers had become one of the largest tanks among our production.

RESIN SELECTION:

Hetron 922 vinyl ester resin: Corrosion Liner
 Hetron 99P: fire retardant for structural laminate

CURE SYSTEM:

DMA/CoNap/MEKP
